<b>Version:</b>	<b>Tags:</b>
<b>Platform Release:</b>	<b>Sprint:</b>
<b>Description</b> Packages are unique in a repo by NEVRA. When implemented, this will cause the most recently added unique NEVRA to be kept and other duplicate NEVRA to be removed. Duplicate NEVRA could have different checksums. <pre>[[   'model': Package,   'field_names': ['name', 'epoch', 'version', 'release', 'arch'] ]]</pre>	
Use a RemoveDuplicates stage provided by pulpcore-plugin.

Adding duplicate NEVRA with different checksum testcase

This commit adds a test for adding the same NEVRA content with different checksums and ensuring only the latest content is present( the old contents are removed)
