**Description**

Hi, I'm currently trying to use pulp 3 with the RPM plugin, and I'm facing a problem when I follow the workflows. After creating the repo and the remote, I want to sync the repo, and the API returns the task, and nothing happens. After checking the logs an error has occurred

```
Jan 14 11:06:19 localhost.localdomain rq-15377: File "pulpvenv/lib64/python3.6/site-packages/pulpcore/plugin/models/remote.py", line 61, in get_downloader
Jan 14 11:06:19 localhost.localdomain rq-15377: return self.download_factory.build(url, **kwargs)

```

Has anyone had this issue before?

## History

### #1 - 01/14/2019 08:17 PM - ttereshc

Please, provide which versions of the core and plugins you are using. The result of the GET request to the status endpoint would be helpful. E.g.

```
$ http http://your_pulp_host.com/pulp/api/v3/status/
```

### #2 - 01/14/2019 08:18 PM - ttereshc

- Project changed from Pulp to RPM Support
- Subject changed from RPM Pluggin pulp 3 to AttributeError: 'RpmRemote' object has no attribute 'connection\_limit'
- Category deleted (API)
- Sprint/Milestone deleted (3.0)

### #3 - 01/14/2019 08:22 PM - alexandreC

**#4 - 01/14/2019 08:37 PM - ttereshc**

Can you, please, try to downgrade to previous beta for pulpcore <https://pypi.org/project/pulpcore/3.0.0b17/> ?  
It should help.  
And we'll make sure we pin the compatible versions properly.  
Thank you!

**#5 - 01/14/2019 08:47 PM - ttereshc**

- *Project changed from RPM Support to Pulp*
