Description

The model viewset is not really intended to be used the way we're using it. Instead of allowing a "create" action on /content/python/python/, we should instead create a separate API endpoint for uploading new content, and get rid of what we currently have.

Example:

Update:

Was blocked by rc3 work, now merged.

PR for the feature is almost complete and passing tests, just adding docs today, rebasing and then will update status to POST:
