Triaged:	Yes		

Description

Description of problem:

Docker repo upload does not generate correct unit_key and it skips uploading some image layers when there are multiple leaf nodes.

```
$ pulp-admin docker repo create --repo-id=busybox
```

```
$ pulp-admin docker repo uploads upload --repo-id=busybox -f /home/skarmark/git/pulp1/pulp/busybox.tar
```

```
$ pulp-admin docker repo list
```

Id: busybox

Display Name: busybox

Description: None

Content Unit Counts:

Docker Image: 4

Only 4 images are uploaded when busybox actually contains more images.
