

Pulp - Issue #4455

S3 doesn't work if you follow the guide in our docs

02/25/2019 01:29 PM - daviddavis

Description

You get a permission denied error if you set up pulp + S3 according to our docs. This warning somewhat explains the problem:

```
The default behavior of S3Boto3Storage is insecure and will change in django-storages 2.0. By default files and new buckets are saved with an ACL of 'public-read' (globally publicly readable). Version 2.0 will default to using the bucket's ACL. To opt into the new behavior set AWS_DEFAULT_ACL = None, otherwise to silence this warning explicitly set AWS_DEFAULT_ACL.
```

More info <https://github.com/jschneier/django-storages/issues/381>

The temporary fix is to set AWS_DEFAULT_ACL to 'None' in our settings. Not sure if we should update our docs since this is a temporary problem that should be resolved in django-storages 2.0.

History

#1 - 02/25/2019 05:55 PM - bmbouter

+1 to updating the docs temporarily and linking to this issue in there as well.

#2 - 02/26/2019 05:01 PM - CodeHeeler

- Triaged changed from No to Yes

#3 - 04/26/2019 10:31 PM - bmbouter

- Tags deleted (Pulp 3)

#4 - 08/31/2020 05:51 PM - daviddavis
