

RPM Support - Refactor #4473

RPM upload: filename parameter is not documented in the api docs, is redundant

Description

Looking at the docs for uploading:

<https://pulp-rpm.readthedocs.io/en/latest/workflows/upload.html#create-rpm-content-from-an-artifact>

The filename parameter doesn't show up in the api docs (it's not on the serializer). Also, it seems redundant to have a relative_path parameter and a filename parameter.
