<b>Description</b>			
<p>The current installer and roles for Pulp 3 are tied to the pulp3 version disallowing flexibility for semantic versioning of Pulp and the installer going forward. I would recommend dropping the '3', e.g. `ansible-pulp` and `pulp` and `pulp-redis` for role names.</p> <p>Further, current variables used inside the roles are not following best practices for variables being namespaced by the role name. Dropping the '3' would align these variables to best practices.</p>
