Description 1. Sync kickstart tree with on_demand policy. 2. Switch to immediate policy and re-sync. 3. Note that subrepos (HighAvailability, Addons) have broken symlinks because Pulp doesn't support subrepos but it seems like symlinks are still created for those during on_demand sync. That causes Pulp to Pulp sync to fail. Pulp should not create symlinks for the unsupported parts of kickstart trees.
