

RPM Support - Test #4547

Test # 4543 (CLOSED - COMPLETE): Test newly described definitions of recursive and recursive_conservative flags

Ensure rich_weak_deps test includes --recursive and --recursive_conservative cases

03/18/2019 05:31 PM - bherring

Status: CLOSED - COMPLETE	
Priority: High	
Assignee: kersom	
Category:	
Sprint/Milestone:	
Version:	Sprint:
Platform Release:	Quarter:
Tags: Pulp 2	
Description	
Parent Tickets	
<ul style="list-style-type: none">• #3740 --> #4162 --> #4364	
Affected File(s)	
<ul style="list-style-type: none">• test_rich_weak_dependencies.py::CopyRecursiveUnitsTestCase	
Update	
<ul style="list-style-type: none">• Ensure rich_weak_deps test includes --recursive and --recursive_conservative cases• Ensure that latest RPM copy test case is included in rich and weak logic	
Notes	
Milan created the following fixture for this test case:	
<ul style="list-style-type: none">• https://repos.fedorapeople.org/pulp/pulp/fixtures/rpm-richnweak-deps/	
The fixture seems to follow the same missing logic as other tests before documentation was provided:	
<ul style="list-style-type: none">• Check if there is an older RPM on the remote REPO, if --recursive is used, the newer RPM is copied as well• If both flags are used, ensure only conservative logic works (does not upload the latest RPM)• If modules are included in the fixture, ensure all modules and erratum are copied. RPMS still obey the flags logic	

History

#1 - 03/18/2019 05:31 PM - bherring

- Priority changed from Normal to High

#2 - 03/19/2019 01:31 PM - bherring

- Sprint/Milestone set to 2.19.0

#3 - 03/19/2019 01:33 PM - bherring

- Sprint/Milestone deleted (2.19.0)

#4 - 03/22/2019 06:34 PM - bherring

- Assignee set to kersom

#5 - 03/22/2019 06:44 PM - bherring

- Status changed from NEW to MODIFIED

Notes

PR: <https://github.com/PulpQE/Pulp-2-Tests/pull/178>

Takes care of investigation into rich and weak.
