Description

Problem

The Puppet repository is confusing users because the master branch shows 'this is the Pulp3 plugin for Puppet....". This is really just a stub and the plugin is in no way functional.

Solution

Delete the 'master' branch and make the default branch '2-master'. This is similar to what was done to the pulp/pulp repository which is also a Pulp2 only repository.

Clearly mark pulp2 support

The readme didn't indicate which verison of Pulp it was for. This clearly marks it as Pulp2.
