<b>Description</b>  <ol style="list-style-type: none"><li>1. Create an RPM repository</li><li>2. Populate it with content</li><li>3. Create a second, empty RPM repository</li><li>4. Use the copy API endpoint to copy all content from the first repository into the second repository</li><li>5. Check that a new repository version was created in the second repository, and that it has identical content to the first</li></ol> <p>The copy API works as follows</p> <pre>http --form POST http://localhost:24817/pulp/api/v3/rpm/copy/ source_repository=\${SRC_REPO_HREF} destination_repository=\${DEST_REPO_HREF}</pre> <p>(exact parameter names TBD)</p>
