Description

This test follows these docs: https://github.com/pulp/pulp_ansible#mazer-publish

You should be testing against the latest checkout of <https://github.com/ansible/mazer/> and specifically the 'devel' branch.

1. Build the 'hello' collection like the docs say (with the mazer source, from the mazer source)
2. configure mazer to point to a Distribution on Pulp. (note for this test the Distribution doesn't yet have to exist)
3. mazer publish
4. Verify the content is listed at <http://localhost:24817/pulp/api/v3/content/ansible/collections/>
