Description	
This test follows these docs: https://github.com/pulp/pulp_ansible#mazer-install	
You should be testing against the latest checkout of https://github.com/ansible/mazer/ and specifically the 'devel' branch.	
<ol style="list-style-type: none">1. Ensure that a collection unit is available at a specific Distribution2. configure mazer to point to the Distribution that contains that unit3. mazer install that collection by {namespace}.{name}4. Verify the content installed correctly
