Description			
pulp_ansible should have API docs similar to what the pulp_file docs have here: https://pulp-file.readthedocs.io/en/latest/restapi/index.html			
This does not need to include the Galaxy URLs, only for the Pulp components, e.g. AnsibleDistribution. It's ok if the Galaxy stuff is also there, just not a requirement.

Adds in a live API part to the docs!

The api.json asset will be updated everytime someone runs make html. The committed api.json file drives the browsable version hosted on RTD.
