<b>Description</b>			
For example we have seen 451 (governmental censorship), but we could trace it down to the server denying access when requests was used. This can be circumvented by setting the User-Agent header field to smth else. PR available: <a href="https://github.com/pulp/pulp/pull/3925">https://github.com/pulp/pulp/pull/3925</a>
