

Pulp - Task #4926

Story # 4082 (CLOSED - CURRENTRELEASE): As a plugin writer I can use plugin_template to bootstrap or update a plugin

switch template entirely to jinja

06/06/2019 11:27 PM - amacdona@redhat.com

Status:	CLOSED - CURRENTRELEASE	Start date:	
Priority:	Normal	Due date:	
Assignee:	amacdona@redhat.com	% Done:	100%
Category:		Estimated time:	0:00 hour
Sprint/Milestone:	3.0.0	Tags:	Plugin Template
Platform Release:		Sprint:	Sprint 54
Groomed:	Yes	Quarter:	
Sprint Candidate:	Yes		
Description			
This task does not affect generate_travis_config.			
1. Create a new CLI with 1 command `bootstrap`.			
2. Modify all string formatting templates to jinja			
The bootstrap command will only need to accept 1 argument "name". Implement this as a positional arg, but it will be replaced in a later story by yaml config.

Revision df12565c - 06/20/2019 03:29 PM - amacdona@redhat.com

Use jinja2 to template all files

Primary change: use jinja templates rather than string substitution.

Secondary change: rework the mechanisms of the plugin template to allow templating each of files in the selected section.
