

Pulp - Test #4933

Rename Pulp2 static directory to not conflict with Pulp3

06/07/2019 07:09 PM - bherring

Status: CLOSED - WONTFIX	
Priority: Normal	
Assignee:	
Category:	
Sprint/Milestone: 2.20.0	
Version:	Sprint:
Platform Release: 2.20.0	Quarter:
Tags: Pulp 2	
Description	
Problem	
The only thing left in /var/lib/pulp/ that conflicts between pulp2 and pulp3 is /var/lib/pulp/static	
At installation time, this causes an error when deploying pulp3 onto a pulp2 server because on pulp2 this directory is owned by apache, and pulp3 expects this to be owned by pulp_user.	
Solution	
To allow the long-term state of Pulp3 to make the most sense we've taken the approach in other areas to rename the Pulp2 once and advertise that breaking change loudly on pulp-list early.	
Create a new migration that will rename /var/lib/pulp/static/ to /var/lib/pulp/pulp2static
