

## Docker Support - Issue #4959

### Do not log that a download fails with 401 (INFO) unless it fails again after token refresh

06/12/2019 02:13 PM - amacdona@redhat.com

<b>Status:</b> NEW	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>

<b>OS:</b>	<b>Quarter:</b>
<b>Triaged:</b> Yes	

**Description**

Normal operation includes occasional download failures due to token timeouts. In this case, we should not alarm the user with failures in the log until there is an actual problem.

I think we should keep the logs, but lower it to DEBUG.
