Revision 03374b0a - 06/18/2019 12:18 AM - bmbouter

Default to localhost bind and move var

The pulp_content_host was being defined in pulp-content, but being used in the 'pulp' role. This moves the setting to the pulp/README.md and removes it from being a default specified by main.yml.

Also the pulp_content_bind is now 127.0.0.1 instead of 0.0.0.0 as part of story 4963.
