

Pulp - Task #4966

Task # 4961 (NEW): [Epic] Improve Integration and Testing with Nginx and Apache

Nginx needs to expose both pulp-api and pulp-content-app

Tags:	Pulp 3 installer		
Description			
Problem			
Currently the nginx config you get from the installer only serves pulp-api via port 80. Users need a reliable, sane way to have nginx serve both pulp-api and pulp-content-app			
Solution			
1. Add a second upstream to the nginx config for the pulp-content-app 2. Either namespace the two applications or route to one and then fall back to the other			
NOTE: we want this listening on port 80 so that users with web browsers get a good experience from this config.

Revision b35894b6 - 08/06/2019 11:05 PM - bmbouter

Allows nginx to reverse proxy both services

Without this urls outside of /pulp/content/ and /pulp/api/ would not route correctly. This causes the last block to try both services if the first one 404s.
