I think bcourt refactored a lot of this, and I don't think it is common to attempt builds on Python 2.6. Is this still needed?

I sometimes use EL 6 as a dev environment, which was why I filed this bug in the first place. However, now that I think about it and consider that I'm probably the only person that does that, it's probably not

worth worrying about. So if you want, we can close this.
