#### Description

An ansible/collection distribution does not have a url that one can consume content from Pulp easily.

 'repository': '/pulp/api/v3/repositories/e7e09c87-6d3c-4514-afc4-a1b6ee4ea176/',
 'repository_version': None}
```

See: <https://pulp-ansible.readthedocs.io/en/latest/workflows/mazer-client.html#install-a-collection-hosted-by-pulp-using-mazer>

url: http://localhost:24817/pulp\_ansible/galaxy/dev

This is assuming you have the Collection content exposed at a Distribution created with base\_path=dev (as in the example above).

Extra steps required in order to build the url to consume content using mazer.
