

Ansible Plugin - Issue #4996

Ansible collection remote doesn't handle trailing / in sync url

06/19/2019 10:06 PM - sajha

Status: CLOSED - CURRENTRELEASE	Start date:
Priority: Low	Due date:
Assignee: fao89	Estimated time: 0:00 hour
Category:	
Sprint/Milestone:	
Severity: 2. Medium	Sprint Candidate: No
Platform Release:	Tags: Katello
OS:	Sprint: Sprint 56
Triaged: Yes	Quarter:
Groomed: No	

Description
Ex:
With a url <https://galaxy.ansible.com> it works fine.
With a url <https://galaxy.ansible.com/> , throws the following error: <https://gist.github.com/sjha4/0afdd783bac7cea56055b706f6b02155>

We should solve this by validating the user input and checking it ends in a /.

This change added an error message for the trailing "/". Is there a reason we do not want to allow the trailing "/" ? We are going to handle this in our calls to pulp. However, wondering why it's not allowed..

#11 - 08/29/2019 04:21 PM - bmbouter

Earlier in pulp_ansible sync was actually a call to the mazer client, so the URL was passed directly to mazer. If that URL contained a slash mazer would fail. This change in Pulp was a workaround to avoid this unfixed mazer issue: <https://github.com/ansible/mazer/issues/288>

However, after this was merged, the use of mazer (and this validation workaround) were both removed as part of <https://pulp.plan.io/issues/5165> So in terms of the current state of the code this shouldn't be an issue. If you see any issues currently with trailing slashes please let us know.
