#### Description

It would be helpful to see artifact sha details on the content details/list results to avoid an additional call to artifacts API to fetch sha details.

This endpoint should ideally provide sha details in results:

[https://pulp-ansible.readthedocs.io/en/latest/restapi.html#operation/content\\_ansible\\_collections\\_list](https://pulp-ansible.readthedocs.io/en/latest/restapi.html#operation/content_ansible_collections_list)

##### Revision 7fb42a1e - 07/04/2019 05:24 PM - bmbouter

Add sha details to Collection list and detail APIs

The list and detail Collection APIs now include various sha details of the associated Artifact. For example sha256, md5, etc. This avoids some clients, e.g. Katello from making additional calls for the sha data while users who want less data serialized over the interface can limit the fields.

<https://pulp.plan.io/issues/5018> closes #5018
