

Pulp - Story #5044

Story # 3802 (NEW): [Epic] As a user, I can override a remote's settings when making a request to start a sync

As a plugin writer, I have docs on how to have custom Remote fields be usable for 1-time options

Description

The plugin writer docs should have a section that covers how to add this. Effectively the plugin writer must:

1. Include custom Remote fields by subclassing RepositoryURLSerializer similar to how RepositoryURLSerializer subclassed RemoteSerializer in core.
2. Have the plugin's view specify their subclassed serializer.

The core provided feature should be identified that `get_object()` method work generically so the plugin writer does not have to take an additional step to overlay custom attributes.

History

#1 - 06/26/2019 06:57 PM - ttereshc

- Groomed changed from No to Yes

#2 - 06/26/2019 07:04 PM - ttereshc

- Sprint/Milestone set to 3.0

- Sprint set to Sprint 55

#3 - 07/12/2019 03:27 PM - dkliban@redhat.com

- Sprint changed from Sprint 55 to Sprint 56

#4 - 07/14/2019 10:16 PM - bmbouter

- Sprint/Milestone deleted (3.0)

- Sprint deleted (Sprint 56)

One time options is being pulled out of 3.0 due it not being completed and no stakeholder or user currently requesting it.
