**Description**

Example: [https://travis-ci.org/pulp/pulp\\_file/jobs/553829203#L505-L508](https://travis-ci.org/pulp/pulp_file/jobs/553829203#L505-L508)

Error:

```
.travis/before_install.sh: 49: .travis/before_install.sh: pushd: not found
fatal: not a git repository (or any of the parent directories): .git
fatal: not a git repository (or any of the parent directories): .git
.travis/before_install.sh: 52: .travis/before_install.sh: popd: not found
```

We think the problem is that Travis is using Ubuntu which has dash and push/popd are bash extensions.

#### Associated revisions

##### Revision 06541f8c - 07/09/2019 11:51 PM - gmbnomis

Improve before\_install.sh

- Use bash and the more secure set -mveuo pipefail (as in other scripts)
- Use shallow clones and shallow fetch to speed up the CI run (Especially pulpcore takes a long time to clone completely. We don't need any history when building in the CI.)
- get rid of pushd/popd (bashism that is not needed here)
