

## RPM Support - Issue #518

### /etc/pulp/repo\_auth.conf doesn't have in-code defaults like our other config files have

02/28/2015 11:19 PM - rbarlow

<b>Status:</b> CLOSED - WONTFIX	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>Estimated time:</b> 0:00 hour

<b>OS:</b>	<b>Sprint:</b>
<b>Triaged:</b> Yes	<b>Quarter:</b>

**Description**

Description of problem:  
Currently there is no way to specify all of the config defaults for repo\_auth.conf. In fact, most of those settings are required to be present, or the WSGI access script will fail.

Version-Release number of selected component (if applicable):  
2.4.0

How reproducible:  
Every time

Steps to Reproduce:  
1. Make repo\_auth.py empty.  
2. Restart apache.  
3. Try to access a protected repository.

Actual results:  
The access script will fail due to the values in repo\_auth being required.

Expected results:  
There should be sane defaults for all settings in repo\_auth.conf.
