**Description**

rpmlint -i gives the following warnings:

```
$ rpmlint i-pulp.spec
pulp.spec:271: W: unversioned-explicit-obsolete-pulp
The specfile contains an unversioned Obsolete: token, which will match all
older, equal and newer versions of the obsoleted thing. This may cause update
problems, restrict future package/provides naming, and may match something it
was originally not intended to match -- make the Obsolete versioned if
possible.
```

pulp.spec:361: W: unversioned-explicit-obsolete-pulp-common  
The specfile contains an unversioned Obsolete: token, which will match all  
older, equal and newer versions of the obsoleted thing. This may cause update  
problems, restrict future package/provides naming, and may match something it  
was originally not intended to match -- make the Obsolete versioned if  
possible.

pulp.spec:413: W: unversioned-explicit-obsolete-pulp-client-lib  
The specfile contains an unversioned Obsolete: token, which will match all  
older, equal and newer versions of the obsoleted thing. This may cause update  
problems, restrict future package/provides naming, and may match something it  
was originally not intended to match -- make the Obsolete versioned if  
possible.

pulp.spec:461: W: unversioned-explicit-obsolete-pulp-admin  
The specfile contains an unversioned Obsolete: token, which will match all  
older, equal and newer versions of the obsoleted thing. This may cause update  
problems, restrict future package/provides naming, and may match something it  
was originally not intended to match -- make the Obsolete versioned if  
possible.

pulp.spec:489: W: unversioned-explicit-obsolete-pulp-consumer  
The specfile contains an unversioned Obsolete: token, which will match all  
older, equal and newer versions of the obsoleted thing. This may cause update  
problems, restrict future package/provides naming, and may match something it  
was originally not intended to match -- make the Obsolete versioned if  
possible.

pulp.spec:561: W: unversioned-explicit-obsolete-pulp-selinux-server  
The specfile contains an unversioned Obsolete: token, which will match all  
older, equal and newer versions of the obsoleted thing. This may cause update  
problems, restrict future package/provides naming, and may match something it  
was originally not intended to match -- make the Obsolete versioned if  
possible.
