

Pulp - Issue #5195

Removal of python2-celery-4.0.2-5.el7sat.noarch leave behind systemd files

07/30/2019 10:42 PM - chrobert@redhat.com

Status:	CLOSED - WONTFIX	Start date:	
Priority:	Normal	Due date:	
Assignee:		Estimated time:	0:00 hour
Category:			
Sprint/Milestone:			
Severity:	1. Low	Groomed:	No
Version:	2.18.1	Sprint Candidate:	No
Platform Release:		Tags:	Pulp 2
OS:	RHEL 7	Sprint:	
Triaged:	Yes	Quarter:	
Description			
When removing python2-celery-4.0.2-5.el7sat.noarch			
This file gets left behind:			
'/etc/systemd/system/multi-user.target.wants/pulp_celerybeat.service',			
When removing pulp either manually or with katello-remove we should not have any artifacts leftover.			

History

#1 - 07/31/2019 02:59 PM - chrobert@redhat.com

Also we have these files left behind too:

```
'/etc/systemd/system/multi-user.target.wants/pulp_resource_manager.service',  
'/etc/systemd/system/multi-user.target.wants/pulp_streamer.service',  
'/etc/systemd/system/multi-user.target.wants/pulp_workers.service',
```

#2 - 08/02/2019 04:45 PM - ttereshc

Did you remove python2-celery-4.0.2-5.el7sat.noarch only?
Can you elaborate what exactly you removed and how?

The remaining items in /etc which you referred to, are they symlinks to files under /usr, or actual files under /etc?

#3 - 08/05/2019 03:01 PM - chrobert@redhat.com

Hi,

We are using this script to remove things from Katello:

<https://github.com/theforeman/foreman-packaging/blob/rpm/develop/packages/katello/katello/katello-remove>

#4 - 08/06/2019 04:42 PM - amacdona@redhat.com

- Triaged changed from No to Yes

#5 - 08/06/2019 09:20 PM - mdepaulo@redhat.com

Also, I am not sure why removing python2-celery should ever remove the service file.

The service file is provided by "pulp-server", a subpackage of pulp:

<https://github.com/pulp/pulp-packaging/blob/5089c3618a985f73638d72e3ff8e1d35ac80576a/packages/pulp/pulp.spec#L470>

And "pulp-server" calls the systemd scriptlet, that we would expect to remove the symlink under /etc:

<https://github.com/pulp/pulp-packaging/blob/5089c3618a985f73638d72e3ff8e1d35ac80576a/packages/pulp/pulp.spec#L529>

#6 - 09/25/2020 04:14 PM - dkliban@redhat.com

- Status changed from NEW to CLOSED - WONTFIX

Pup 2 is in maintenance mode.
