Description	
Ex: With a url https://galaxy.ansible.com it works fine. With a url https://galaxy.ansible.com/ , throws the following error: https://gist.github.com/sjha4/0afdd783bac7cea56055b706f6b02155

History

#1 - 08/13/2019 04:42 PM - kersom

- Copied from Issue #4996: Ansible collection remote doesn't handle trailing / in sync url added

#2 - 08/13/2019 04:42 PM - kersom

- Subject changed from Test - Asible collection remote doesn't handle trailing / in sync url to Test - Ansible collection remote doesn't handle trailing / in sync url

#3 - 08/13/2019 06:40 PM - bmbouter

The code changed in pulp_ansible and there is no longer code that performs validation in this way. This was an issue when we handed the url to mazer, but we no longer do that. Given that, we should close this as NOTABUG.
