Same problem here as well. CentOS 6.5.

Found an rpm here and installed via yum: <http://pkgs.org/centos-6/repoforge-i386/python-amqplib-1.0.2-1.el6.rf.noarch.rpm.html>

Then I was able to yum install python-gofer-amqplib. I have not tested further at this time, just dropping a note here if it helps anyone.

Gofer 1.4 provides python-gofer-amqp which works with the celery fork python-amqp that we provide. gofer 1.4 is already included in 2.6 alpha builds.
