<b>Sprint Candidate:</b>	No		
<b>Description</b>			
See the Migration Plan schema in <a href="#">#5178</a> for the way to specify Pulp2 repository to create a set of repo versions from.			
By default, if all repositories are migrated without any specification for repo versions, each repository should be migrated into a repository with one repo version.			
It should happen after the content migration step and based on the pre-migrated RepoContent data from Pulp 2.

#### Associated revisions

##### Revision 87df44f9 - 10/18/2019 09:03 PM - ttereshc

Create repo versions

By default, create one repo version per each pulp 2 repo. If the specific migration plan exists for repo version creation, follow it.

Repositories are created based on the provided name in the migration plan. If such repo exists in pulp 2, its description will be migrated, otherwise Pulp 3 repo is created with the description as its name.

closes #5342 <https://pulp.plan.io/issues/5342>
