

## RPM Support - Task #5354

Travis PR test runner needs to be able to skip certain tests every time, leaving them for the nightly run that runs all tests.

### Description

Some tests run long for example a full EPEL sync test takes 50 minutes. Each plugin itself could handle this, but it would be much better to have the plugin\_template provide facilities.

Specifically a way to have a subset of tests run on Travis at PR time (instead of all tests) would be ideal.

### History

#### #1 - 08/27/2019 02:08 PM - kersom

We can evaluate the adoption of [pytest markers](#)

#### #2 - 09/02/2019 05:24 PM - bmbouter

That does look like the right mechanism. Also even though various developers use various test runners, the Travis environment uses pytest so this seems correct.

#### #3 - 09/03/2019 02:17 AM - kersom

For example, the markers adopted by [Pulp 2 tests](#)
