

## Pulp - Task #5393

### [Epic] plugin-template should let plugins publish their container images, based on a pulpcore image

09/03/2019 07:20 PM - mdepaulo@redhat.com

<b>Status:</b>	NEW	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	mdepaulo@redhat.com	<b>% Done:</b>	0%

<b>Platform Release:</b>		<b>Sprint:</b>	
<b>Groomed:</b>	No	<b>Quarter:</b>	
<b>Sprint Candidate:</b>	Yes		

#### Description

Currently, plugin-template builds an entire container image (from fedora:30 up) through the content plugin during CI.

It is not published.

it is also inefficient and less reproducible than being based on a "pulpcore" image.

This work was previously part of [#5004](#) and [#5062](#). However, most of the value for those tasks was delivered, and this work can be done afterwards. Also, it should have been separate subtasks anyway. So it is being moved into this Epic.

#### Subtasks:

Task # 5394: Separate out building the pulpcore container image from building a plugin ...	<b>NEW</b>
Task # 5395: Add container image publishing to plugin-template	<b>NEW</b>
Task # 5396: Build & Publish the all-in-one "pulp" image	<b>NEW</b>
