

Pulp - Issue #5447

/etc/pulp/server.conf still has owner "root:apache" after upgrade

09/13/2019 10:40 AM - gmbnomis

Status:	CLOSED - WONTFIX	Start date:	
Priority:	Normal	Due date:	
Assignee:		Estimated time:	0:00 hour
Category:			
Sprint/Milestone:			
Severity:	2. Medium	Groomed:	No
Version:	2.20.0	Sprint Candidate:	No
Platform Release:		Tags:	Pulp 2
OS:	RHEL 7	Sprint:	Sprint 61
Triaged:	Yes	Quarter:	

Description

After an upgrade to Pulp 2.20.1 (from 2.17), /etc/pulp/server.conf is owned by "root:apache" still:

```
-rw-r-----. 1 root apache 422 Feb 5 2019 server.conf
-rw-r-----. 1 root pulp 15922 Sep 9 19:34 server.conf.rpmnew
```

server.conf.rpmnew is created with the correct owner. But the existing config file is not updated.

History

#1 - 09/13/2019 04:38 PM - fao89

- Triaged changed from No to Yes

- Sprint set to Sprint 59

#2 - 09/27/2019 03:46 PM - rchan

- Sprint changed from Sprint 59 to Sprint 60

#3 - 10/02/2019 07:00 PM - rchan

As per irc conversation, the creation of a server.conf.rpmnew with the correct owner and no updating of the existing config file is expected. We didn't discuss the ownership of the previous file, but given that there would need to be sysadmin intervention to get the config file in working order means that they can take care of the file at the same time. Can we close as Won't fix?

#4 - 10/25/2019 09:46 AM - rchan

- Sprint changed from Sprint 60 to Sprint 61

#5 - 10/25/2019 11:04 AM - ggaaney

- Status changed from NEW to CLOSED - WONTFIX

Per commentary in [#3](#), closing
