**Description**

There are a few areas of Pulp3 that are merged, but may have changes made to it in the future. The docs need to clearly indicate these at the top of those documentation sections.

**Items**

- S3 Support
- The django-admin stage-profile-summary command
- PROFILE\_STAGES\_API setting <https://docs.pulpproject.org/en/3.0/nightly/installation/configuration.html#profile-stages-api>
- Exporters
- The names of tasks, we know we're moving them some later.

What about adding the Exporter code as well?

I personally don't think we need to label them because they are so straightforward, but you feel we should I'm ok w/ that.

Some of these things aren't in our docs. What if we have a tech preview list in our 3.0 announcement?

We probably should include this in the 3.0 announcement either way. I started that doc here:

[https://docs.google.com/document/d/1WC\\_ooHYuYINGbGg9WOBW3Qbq9E7YAx1By1F2ZODOMFk/edit](https://docs.google.com/document/d/1WC_ooHYuYINGbGg9WOBW3Qbq9E7YAx1By1F2ZODOMFk/edit)

We should add a section to the changelog also maybe?

What about adding labels to the docstrings so they show up in the swagger API docs?

That sounds good.

What about adding labels to the docstrings so they show up in the swagger API docs?

If there's an easy way to do this (and it's easy to rollback once we release 3.1) then that sounds fine to me. I don't think there is though?

Actually, Exporters are the only thing here that show up in the REST API. We could label those as tech preview in the docstring/swagger API I think.
