

## Pulp - Issue #559

### Traceback is shown in consumer.log if pulp-consumer experiences an authentication failure

02/28/2015 11:37 PM - igulina@redhat.com

<b>Status:</b>	CLOSED - CURRENTRELEASE	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	amacdona@redhat.com	<b>Estimated time:</b>	0:00 hour
<b>Category:</b>			
<b>Sprint/Milestone:</b>			
<b>Severity:</b>	2. Medium	<b>Groomed:</b>	No
<b>Version:</b>	2.5	<b>Sprint Candidate:</b>	No
<b>Platform Release:</b>	2.6.0	<b>Tags:</b>	Pulp 2
<b>OS:</b>		<b>Sprint:</b>	
<b>Triaged:</b>	Yes	<b>Quarter:</b>	

#### Description

Description of problem:

If pulp-consumer is used without proper authentication, a traceback is logged on the .pulp/consumer.log. Logging a failed authentication is perfectly reasonable, but logging a traceback is not. Remove the traceback and instead log a simple message about the failed authentication attempt, including the username attempted.

Version-Release number of selected component (if applicable):

```
rpm -qa | grep pulp-server
```

```
pulp-server-2.5.0-0.6.beta.fc20.noarch
```

How reproducible:

always

Steps to Reproduce:

```
pulp-consumer -u admin -p wrong_pass register --consumer-id gena
```

Authentication Failed

A valid Pulp user is required to register a new consumer. Please double check the username and password and attempt the request again.

```
less .pulp/consumer.log
```

```
2014-10-02 14:08:49,389 - ERROR - Client-side exception occurred
```

Traceback (most recent call last):

```
File "/usr/lib/python2.7/site-packages/pulp/client/extensions/core.py", line 478, in run
```

```
exit_code = Cli.run(self, args)
```

```
