

## RPM Support - Task #5619

### pulp-rpm-prerequisites (git) and pulp.pulp\_rpm\_prerequisites (galaxy) are inconsistently named

#### Description

If you clone "pulp-rpm-prerequisites" from github, it has dashes. You specify that quoted string in your vars file for the role name (prereq\_role).

if you install it from ansible galaxy, it must be specified as "pulp.pulp\_rpm\_prerequisites" instead.

Both names are specified across different docs.

The "pulp." prefix is kind of obvious, but the dashes vs underscores is not. It's easy to make this mistake.

The underscores are **required** by ansible galaxy, but not ansible core/engine. Dashes and dots be auto-converted to underscores during galaxy upload.

The git repo should be renamed with underscores.

We should also determine if it is possible for users to specify it without the prefix. Perhaps "role\_name" needs to be set? Or perhaps the new Ansible Galaxy FQDNs for rolenames will enable this.

#### Associated revisions

##### Revision 99e2fce9 - 11/08/2019 06:27 PM - Mike DePaulo

Problem: pulp-rpm-prerequisites (git) and pulp.pulp\_rpm\_prerequisites (galaxy) are inconsistently named

Solution: Git repo got renamed to underscores, now update the docs for it.

Implementation includes:

1. Add install instructions, including symlinking git clones from pulp\_rpm\_prerequisites to pulp.pulp\_rpm\_prerequisites .

Fixes: #5619 pulp-rpm-prerequisites (git) and pulp.pulp\_rpm\_prerequisites (galaxy) are inconsistently named <https://pulp.plan.io/issues/5619>

##### Revision 1df57047 - 11/08/2019 08:38 PM - Mike DePaulo

Problem: pulp-rpm-prerequisites (git) and pulp.pulp\_rpm\_prerequisites (galaxy) are inconsistently named

Solution: Git repo was renamed to underscores, now update the example pulplift config for it.

Also replace the old path that never worked with just the role name, and document what the correct path should be.

Also refresh 3rd party repos.

re: #5619 pulp-rpm-prerequisites (git) and pulp.pulp\_rpm\_prerequisites (galaxy) are inconsistently named <https://pulp.plan.io/issues/5619>

[noissue]

##### Revision 25964ca4 - 11/08/2019 08:59 PM - Mike DePaulo

Update for rename in more places.

Comments, and unused ansible test conventions.

re: #5619 pulp-rpm-prerequisites (git) and pulp.pulp\_rpm\_prerequisites (galaxy) are inconsistently named <https://pulp.plan.io/issues/5619>

[noissue]

## History

---

### #1 - 10/31/2019 05:16 PM - ttereshc

- Groomed changed from No to Yes
- Sprint set to Sprint 61

### #2 - 11/07/2019 03:27 PM - ttereshc

- Tracker changed from Issue to Task
- % Done set to 0

### #3 - 11/08/2019 04:43 PM - mdepaulo@redhat.com

- Status changed from NEW to ASSIGNED

### #4 - 11/08/2019 09:11 PM - mdepaulo@redhat.com

- Status changed from ASSIGNED to CLOSED - COMPLETE

Updated in Pulplift too:

<https://github.com/pulp/pulplift/pull/55>

### #5 - 11/08/2019 09:18 PM - mdepaulo@redhat.com

- % Done changed from 0 to 100

### #6 - 05/13/2020 10:33 PM - bmbouter

- Tags deleted (Pulp 3 installer)

### #7 - 06/11/2020 06:06 PM - bmbouter

- Tags deleted (Pulp 3 RPM blocker)
