

Pulp - Issue #5784

pulp-operator does not properly handle nested settings for Pulp

11/22/2019 05:10 PM - dkliban@redhat.com

Status:	NEW	Start date:	
Priority:	Normal	Due date:	
Assignee:		Estimated time:	0:00 hour
Category:	Operator	Groomed:	No
Sprint/Milestone:		Sprint Candidate:	No
Severity:	2. Medium	Tags:	
Version:		Sprint:	
Platform Release:		Quarter:	
OS:			
Triaged:	Yes		

Description

Pulp operator should use the JSON format for pulp settings. This way the 'to_json' filter will work as expected.

The settings file should be called settings.json.
