

RPM Support - Test #5805

A test scenario for an upload of a single RPM package

Description	
<p>The commit merged via https://github.com/pulp/pulp_rpm/pull/1517 resolved the issue https://pulp.plan.io/issues/5699. It seems like we are missing tests which validate a single upload and its publication.</p>	
<p>Therefore, the following test scenario is proposed:</p>	
<p>1. Create an artifact:</p>	
<pre>http --form POST :24817/pulp/api/v3/artifacts/ file@./giraffe-0.67-2.noarch.rpm</pre>	
<p>2. Create an RPM package:</p>	
<pre>http POST :24817/pulp/api/v3/content/rpm/packages/ artifact="/pulp/api/v3/artifacts/ce225ae1-9cbd-4c20-8f31-c16ab2f0a6c6/" relative_path=giraffe-0.67-2.noarch.rpm</pre>	
<p>3. Add the created content to an empty repository:</p>	
<pre>http POST :24817/pulp/api/v3/repositories/rpm/rpm/75c0c59f-d453-42d3-8d6d-a53561b5d516/modify/ add_content_units:["/pulp/api/v3/content/rpm/packages/3c2ac34c-470e-41b7-85b3-b3830efd4722/\"]</pre>	
<p>4. Create a publication and check if the corresponding task was finished with a success:</p>	
<pre>http :24817/pulp/api/v3/publications/rpm/rpm/ repository=/pulp/api/v3/repositories/rpm/rpm/75c0c59f-d453-42d3-8d6d-a53561b5d516/</pre>
