Per convo during bug triage:

Does this correspond to micro update instructions? Or major/minor version upgrades?

Installer micro-updates: <https://pulp.plan.io/issues/5891>

Installer upgrades: <https://pulp.plan.io/issues/5884>

For now, the logic would be the same between the 2. But at some point, more steps would be involved in upgrades.

Also, what Gluster does for example is put the update/upgrade instructions in their release notes.

Possibly because they feel it makes them more likely to be followed, possibly because it makes them easier to update after release.
