<b>Description</b>			
There currently is a test for the ansible-cli to install a collection here: <a href="https://github.com/pulp/pulp_ansible/blob/master/pulp_ansible/tests/functional/api/collection/v2/test_consume_content.py#L62">https://github.com/pulp/pulp_ansible/blob/master/pulp_ansible/tests/functional/api/collection/v2/test_consume_content.py#L62</a>			
We should improve it in two ways:			
1. Port the pulp interactions to be bindings based			
2. Move it to the 'functional/cli' folder per the parent epic
