Description

In the commit https://github.com/pulp/pulpcore/commit/b7829ee71113f7cd9d24866fc91bca7d1b590848, there was introduced an interface for a signing service.

When an administrator is trying to save a signing script to the database, Pulp performs additional checks whether the signing script is valid or not. On the line https://github.com/pulp/pulpcore/commit/b7829ee71113f7cd9d24866fc91bca7d1b590848#diff-5308662d441ee7c5774295277cba139cR433, however, there is an invalid logical operator used for validating a trust level. Instead of the 'and' operator, there should be used 'or'.
