Sprint Candidate:	No		

Description

Motivation

Several users who use both [pulp_ansible](#) and [ansible-pulp](#) are getting confused. It's difficult to collaborate or discuss things clearly due to this confusion.

Solution

Rename the repository to https://github.com/pulp/pulp_installer which is the moniker it is most commonly referred to as.

The docs would also need to be updated.

Subtasks:

Task # 6461: Rename ansible-pulp to pulp_installer in pulpcore

CLOSED - CURRENTRELEASE

Associated revisions

Revision 0513fae0 - 04/07/2020 07:23 PM - Mike DePaulo

Rename ansible-pulp to pulp_installer

This helps avoid confusion with pulp-ansible, and makes the name valid (no dashes) for publishing to galaxy as a collection.

fixes: #6406 Rename ansible-pulp to pulp_installer <https://pulp.plan.io/issues/6406>

re: #6458 As a user, I can consume pulp_installer as a collection from Ansible galaxy <https://pulp.plan.io/issues/6458>

Revision 4977647d - 04/07/2020 11:11 PM - Mike DePaulo

Rename ansible-pulp to pulp_installer

Also standardize gitmodules config:

1. Track master branches. Users can run: git submodule update --remote
2. Modify the URL so that the pulp org is used rather than the user's clone.

History

#1 - 03/26/2020 08:23 PM - mdepaulo@redhat.com

- Assignee set to mdepaulo@redhat.com

#2 - 04/07/2020 03:49 PM - mdepaulo@redhat.com

The name has been decided on "pulp_installer", since:

1. It is a moniker commonly used.
2. Underscores are valid collection names now, dashes no longer are.
3. There can be other ansible collections / roles for Pulp that are not for installing Pulp. We already have 1 for managing the state of repos:
https://pulpproject.org/related-tooling/#pulp_rpm_repos

#3 - 04/07/2020 03:59 PM - bmbouter

+1 to the name @mikedep333. Would you mind also updating the description at the top with these changes? The names up there are out of date and I try to keep the description up to date as issues progress as a general practice. Thank you for this work!

#4 - 04/07/2020 05:02 PM - mdepaulo@redhat.com

Things that must be updated immediately after rename:

- Check if the old github releases download links still work. If they do not, add additional notes.

Things that should be updated shortly after rename, which can handle the redirect (or are expected to handle it):

- ./ansible-pulp/molecule/default/roles/* (comments and READMEs)
- ./ansible-pulp/README.md
- ./ansible-pulp/template_config.yml
- comments in ansible-pulp/molecule*/Dockerfile.j2
- ./plugin-template (still checks out ansible-pulp, including for "Required PR". Cloning renamed repo (pulp-rpm-prerequisites -> pulp_rpm_prerequisites) does not break, it clones with old name.
- regenerate plugin-template with itself
- ./pulpcore/docs/contributing/dev-setup.rst
- ./pulpcore/docs/installation/instructions.rst
- ./pulpcore/docs/plugins/plugin-writer/concepts/index.rst
- ./pulpcore/docs/client_bindings.rst
- a changes file for pulpcore docs
- comments in ./pulpcore/containers/images/pulp/Dockerfile.j2
- ./pulplift/vagrant/boxes.d/*
- ./pulplift/ (subrepo config)
- ./pulplift/ (submodule update to current commits)
- ./pulplift/README.md
- ./pulplift/ansible.cfg
- ./pulpproject.org/related-tooling.md
- ./pulpproject.org/ (update old blog posts?)
- ./pulp_rpm/docs/installation.rst
- ./pulp_rpm/docs/quickstart.rst
- ./pulp_rpm/docs/bindings.rst
- ./pulp-certguard/docs/installation.rst
- ./pulp_ansible/docs/installation.rst
- ./pulp_python/docs/installation.rst
- ./pulp_file/docs/installation.rst
- ./pulp.pulp_rpm_prerequisites/.ansible-pulp_tox.sh (rename)
- ./pulp.pulp_rpm_prerequisites/.ansible-pulp_tox.sh
- ./pulp_rpm_prerequisites/README.md
- ./pulp_rpm_prerequisites/.github/workflows/pull_request.yaml
- ./pulp_rpm_prerequisites/.github/workflows/pulp_ci.yaml
- ./pulp_container/docs/installation.rst
- ./pulp-2to3-migration/README.md
- ./galaxy_ng_prerequisites/.ansible-pulp_tox.sh (rename)
- ./galaxy_ng_prerequisites/.ansible-pulp_tox.sh
- ./galaxy_ng_prerequisites/.github/workflows/pull_request.yaml
- ./galaxy_ng_prerequisites/.github/workflows/pulp_ci.yaml
- ./galaxy_ng_prerequisites/README.md

Things to be updated at leisure:

- let plugins be regenerated with plugin-template at their leisure
- ./ansible-pulp (regenerate certain files with template)

#5 - 04/07/2020 05:02 PM - mdepaulo@redhat.com

- Description updated

#6 - 04/07/2020 05:17 PM - mdepaulo@redhat.com

- Subject changed from *Rename ansible-pulp* to *Rename ansible-pulp to pulp-installer*

#7 - 04/07/2020 06:30 PM - mdepaulo@redhat.com

- Subject changed from *Rename ansible-pulp* to *pulp-installer* to *Rename ansible-pulp to pulp_installer*

#8 - 04/07/2020 07:21 PM - mdepaulo@redhat.com

bmbouter did the renaming (he has owner rights on github)

The old download links, and links sent in emails, still work. For example: <https://github.com/pulp/ansible-pulp/archive/3.2.1.tar.gz>
<https://github.com/pulp/ansible-pulp/releases/tag/3.2.1>

#9 - 04/07/2020 08:54 PM - pulpbot

- Status changed from *NEW* to *POST*

PR: https://github.com/pulp/pulp_rpm/pull/1670

#10 - 04/07/2020 10:05 PM - Anonymous

- Status changed from *POST* to *MODIFIED*

Applied in changeset [ansible-pulp|0513fae0bf8dc36841154864bf0ac00654145eb2](https://github.com/pulp/ansible-pulp/commit/0513fae0bf8dc36841154864bf0ac00654145eb2).
