Description In some places in our api, we just return an href (eg created resources on tasks). There should be a documented and standard way that a REST API user can rely upon to figure out what type of resource an href refers to.	

History

#1 - 03/30/2020 10:38 PM - daviddavis

This came about because Katello asked how they can determine the type from an href and we didn't have a good answer.

#2 - 03/31/2020 04:32 PM - fao89

- Tracker changed from Issue to Task

- % Done set to 0
