

Container Support - Story #6788

Story # 5027 (CLOSED - CURRENTRELEASE): As a user, I can 'docker push' to a Pulp repository

As an admin i can configure whether foreign layers can be pushed to the registry

Description	
Default behavior during push operations is to skip the foreign layers. We should add possibility to be able to push foreign layers in case of air-gapped env(for example)	
https://github.com/docker/docker.github.io/blob/master/registry/deploying.md#considerations-for-air-gapped-registries	
Not sure if podman supports this at all
