After digging more into this, the cause is URLField from DRF, it uses django validator that introduces <! on the regex that validates the domain URLField:
https://github.com/encode/django-rest-framework/blob/603aac7db10671dea1975ea3023b5488815aa1ca/rest_framework/fields.py#L885-L893 django validator: <https://github.com/django/django/blob/d6aff369ad33457ae2355b5b210faf1c4890ff35/django/core/validators.py#L63-L92>

We need to document to avoid URLField, and prefer CharField

#6 - 05/29/2020 08:41 PM - fao89

- Description updated

#7 - 06/11/2020 10:27 PM - rchan

#8 - 06/26/2020 06:04 PM - rchan

- Sprint changed from Sprint 75 to Sprint 76

#9 - 07/09/2020 07:52 AM - mdellweg

This is claimed to be solved by:

<https://github.com/encode/django-rest-framework/pull/7389>

I think it needs to be verified, however.
