

Pulp - Issue #6835

.travis/release.py in pulpcore creates the wrong version for the final .dev version commit

05/27/2020 05:10 PM - dkliban@redhat.com

Description			
Noticed that when I was releasing 3.4.0 and ran <code>python3 .travis/release.py major</code> The final version was set to 4.0.0.dev when it should have been 3.5.0.dev

How can we document better this script?

Currently it depends on:

```
bump2version  
gitpython
```

it has a help from argparse:

```
python .travis/release.py --help  
usage: release.py [-h] [--lower LOWER] [--upper UPPER] release_part
```

Start the release process.

Example:

```
setup.py on plugin before script:  
version="2.0.dev"  
requirements = ["pulpcore>=3.4"]
```

```
$ python .travis/realease.py minor 4.0 4.1
```

```
setup.py on plugin after script:  
version="2.1.dev"  
requirements = ["pulpcore>=4.0,<4.1"]
```

positional arguments:

```
release_part  Whether the release should be major, minor or patch.
```

optional arguments:

```
-h, --help  show this help message and exit  
--lower LOWER  Lower bound of pulpcore requirement.  
--upper UPPER  Upper bound of pulpcore requirement.
```

Release: x.y.z = major, minor, patch

pulpcore example:

```
python .travis/release.py minor
```

pulp_file example:

```
python .travis/release.py minor --lower 3.3.5 --upper 3.4.0
```

lower and upper are for pulpcore requirement, from the previous example, it should return:

```
pulpcore>=3.3.5,<3.4.0
```

#3 - 05/29/2020 04:35 PM - fao89

- *Triaged changed from No to Yes*
- *Sprint set to Sprint 74*

Use the wiki to document it

#4 - 06/01/2020 05:06 PM - fao89

- *Status changed from NEW to CLOSED - CURRENTRELEASE*
- *Triaged changed from Yes to No*
- *Sprint deleted (Sprint 74)*

Updated the release wiki
