Sprint/Milestone:	
Severity: 2. Medium	Groomed: No
Version: 2.5	Sprint Candidate: No
Platform Release:	Tags: Pulp 2
OS:	Sprint:
Triaged: Yes	Quarter:

Description

Description of problem:

If several SSL vhosts are sharing the same HTTPS port but have different TLS certificates, pulp-admin fails to verify the server's certificate.

Therefor SNI support for the admin client pulp-admin is required.

How reproducible:

Steps to Reproduce:

1. Setup vhosts using the same HTTPS port with different certificates
2. login to pulp
3. enter "pulp-admin repo list"

Actual results:

pulp-admin throws an error, telling the common name does not match peer's name.

History

#1 - 03/02/2015 11:40 PM - cduryee

- Status changed from NEW to ASSIGNED

- Assignee set to cduryee

#2 - 03/03/2015 11:15 PM - cduryee

I contacted the m2crypto maintainer with a usage question. I will continue on this issue once I hear back.

#3 - 03/04/2015 06:25 PM - cduryee

upstream bz: https://bugzilla.redhat.com/show_bug.cgi?id=1198728

I was able to get SNI to work for pulp-admin on Fedora 21 by applying the patch in the bz to httpslib.py. Once the upstream BZ is triaged I will close this issue.

#4 - 03/06/2015 09:59 PM - cduryee

- Status changed from ASSIGNED to 7

upstream BZ is in assigned state, closing this issue.
