

Pulp - Issue #7065

Ansible playbook examples in Pulpcore docs and Pulp Ansible installer docs differ

Description

Firstly, I was looking at the Ansible installer entry in Pulpcore docs <https://docs.pulpproject.org/installation/instructions.html#ansible-installation-recommended> with a view to suggesting we add a summary here and a link to the Ansible installer docs, so that the content only needs to be updated once. I think they might be slipping out of date.

Secondly, I noticed that there is a disparity between the example playbooks shown in the docs:

<https://docs.pulpproject.org/installation/instructions.html#ansible-installation-recommended>

vs

<https://pulp-installer.readthedocs.io/en/latest/quickstart/#example-playbook-for-installing-plugins>

Which is more up to date?

If you're happy for me to:

1. Replace the Ansible installer section in the Pulpcore docs with just a description and redirect to the Pulp Ansible Installer docs
2. Update the existing playbook if necessary

Please let me know.

pulpcore master: <https://docs.pulpproject.org/en/master/nightly/installation/instructions.html#ansible-installation-recommended> the main difference is about getting attention to set the secret and password, and I agree we should update it on pulpcore

I think we should use "<< YOUR SECRET HERE >>", as it is our newer convention, and it is more safe. It prevents users from using a simple guessable secret like that in production.

As fao89 showed, the rest of the playbook on the master branch seems to be identical other than this.

Yep. I wasn't looking at master, just the published docs. I will make that small change!
